LAND MANAGEMENT PLAN

We have reviewed your memo dated November 19, 1975, and have two comments on the criteria. First for Item 3 we suggest, "Access or activities will not be allowed without approval by designated Rockwell or RFTO officials." Second, Item 7 is too restrictive as written since land management may necessitate control of the animal population, especially deer. Therefore, Item 7 should reflect this potential by requiring approval to kill wildlife.

On many occasions, our office has been approached by Rockwell employees with ideas for recreational use of the buffer zone. Therefore, we suggest that some opportunity be provided for employee input into the buffer zone plan.

E. H. Dean
Assistant Area Manager
